EDUCATION

King Fahd University of Petroleum and Minerals (KFUPM), Dhahran
Bachelor's Degree in Electrical Engineering
GPA: of 3.4/4.0; (Honor Graduate)

PROFESSIONAL EXPERIENCE

Assistant Instructor for Intro. to Prog. in Python & C Lang. Course, KFUPM Aug. 2022 – Dec. 2022
Assisted students with debugging, problem-solving, and code organization to improve lab completion and understanding.

Huawei HCIA-AI (Artificial Intelligence) Certification Training Program Jun. 2023 – Jun. 2023
UAS2030 Drone Team Nov. 2023 – Apr. 2026
Dhahran, KSA & Maryland, USA.

1st & 3rd place winner in SUSA2024/SUAS 2025 International competitions

Team Captain: Led team coordination, task planning, and technical decisions

Flight Control Team lead: Designed and tuned flight control algorithms for stable UAV operation - Led testing, debugging, and performance optimization

Active member of the Flight Control Team: Contributing to control system development, simulation, testing, and PCB design for power distribution and battery integration

Operational Amplifier Design Program, KACST Jun. 2024 – Jul. 2024

- Gained hands-on experience in analog integrated circuit design and operational amplifier development using the

Sky Water 130nm PDK (SKY130).

- Designed, simulated, and analyzed op-amp circuits, applying analog CMOS design principles and verification techniques.

Training Program in Rig Manufacturing – BENTEC & KCA Deutag Jun. 2024 – Aug. 2024

Nizwa, Oman

- Assisted in assembly, wiring, inspection, and commissioning activities for drilling-rig electrical systems.

- Performed troubleshooting and diagnostics on power distribution and control systems.

- Supported preventive maintenance and system testing activities in a manufacturing environment.

- Gained exposure to drilling-rig equipment, industrial safety procedures, and operational workflows.

KAUST Academy Artificial Intelligence Specialization Sep. 2024 – Jan. 2025

- Completed coursework covering machine learning, deep learning, generative AI, and AI applications.

- Developed practical skills in AI model development and deployment.

Electric Submersible Pump (ESP) Manufacturing Training Alkhorayef Petroleum Jun. 2025 – Aug. 2025

Shanghai, China

- Participated in ESP assembly, inspection, testing, and quality-control processes.

- Assisted in troubleshooting manufacturing and production issues to ensure equipment reliability.

- Applied engineering principles to improve manufacturing efficiency and equipment performance.

PROJECTS

Load Frequency Control for Renewable Energy

Modeled and simulated a load-frequency control system in Simulink and evaluated controller performance under varying operating conditions.

Dual-Frequency Planar Monopole UAV Antenna

Designed and simulated a dual-frequency planar monopole antenna for UAV communication using Ansys HFSS, optimizing Bandwidth and radiation performance.

Audio Signal Classification using the Free-Spoken Digit Dataset

Built an audio classification workflow and validated performance on spoken-digit samples.

Drone and Bird Detection Using Deep Learning

Built a YOLO-based object detection model to classify and distinguish drones from birds in real-time imagery.

Achieved accurate detection through dataset annotation, model training, and performance evaluation.

Active Aerodynamic Surface Design Formula One Cars

Developed an active-surface concept and assessed its effect on aerodynamic performance.

ADDITIONAL

Certifications: GACA107 Drone Pilot, Huawei HCIA-AI

Technical Skills: Python, Assembly language, PCB Design, Signal Processing, Power Systems, Analog Circuit Design
